

The cost of children's hospice care

acorns
children's hospice

£4 could provide a tasty and nutritious meal for a child in a hospice.

£12 could pay for a specialist art therapy session, supporting self-expression in children with communication barriers.

£27 could help fund a 1-hour psychological therapy support session for a family member.

£60 could provide the funds for a family to stay at Acorns overnight right next to their child's room so they can be with them 24-hours a day.

£138 could provide the funds for a child to have a hydrotherapy session to help manage or reduce their pain.

£700 could fund a suction machine, used to help clear the airway of a child and relieve discomfort.

£1,800 could enable us to take a group of 30 siblings on a trip, helping them to build friendships with others in similar situations and reduce isolation.

£5,982 could help fund a three-day symptom management stay at one of our hospices.

£8,000 could help fund specialist outdoor play equipment for children to use in our hospice gardens.

It costs around **£35,000** per day to run Acorns care services across our hospices and within the community.
